

# Do you know mpox?

Anyone can get mpox, so it's important you know the symptoms, how to protect yourself and what to do if you think you might have it.

## Symptoms of mpox can include:

**Skin rash, pimple-like lesions or sores**  
(particularly in areas that are hard to see such as the genitals, anus or buttocks)

**Fever or chills**

**Headache**

**Muscle or back aches**

**Swollen lymph nodes**

**Fatigue**

If you think you have mpox or have been exposed to it, get tested. Speak to your doctor or contact your local sexual health clinic.
